## Transforming ideas into solutions that improve everyday life.

Aptar Closures is a collaborative partner that unites breakthrough thinking and deep consumer insights to offer innovative and sustainable packaging solutions for multiple markets, such as food, beverage, beauty, personal and home care.

Our solutions help consumers establish a deeper connection with their favorite brands while giving customers a direct path to market share growth and to brighter futures.

**CREATE  
COLLABORATE  
INNOVATE**

# BEVERAGE

Our global and regional teams are dedicated to understanding the **trends influencing consumer behavior**, such as consumers' desire to improve health and well-being, driving them to increasingly incorporate exercise, outdoor activities, and constant hydration into daily routines.

Therefore, **Aptar's expert engineers** constantly adapt beverage closure designs to consumers' changing needs while keep meeting the client's requirements.

**APTAR'S GLOBAL  
SUSTAINABILITY  
COMMITMENTS**

100% of plastic packaging in personal care, beauty, home care, food and beverage markets to be reusable, recyclable or compostable by 2025.

Achieve 10% recycled content for our dispensing solutions for the beauty, personal care, home care, food and beverage markets by 2025.

Global  
Commitment

Our closures are PCR capable (on demand)

# DISPENSING OPTIONS

Aptar Closures is focused on enhancing **product dispensing**. Our dispensing closures come in a **variety of orifice and valve configurations** to ensure your product dispenses as you choose.

Aptar is a global leader in **flow control valves**, with the largest portfolio of valve configurations and over two decades of experience, ensuring **smooth and controlled dispensing** to avoid drips and spills.

SimpliSqueeze<sup>®</sup>  
by Aptar

# OUR EXPERTISE & SERVICES

## Development Capabilities

Our wealth of experience in dispenser and packaging design for manufacturing, on-site rapid prototype molding and testing centers, follows a systematic stage gate process.

## Technical Services

Aptar's experienced technical service team is proud to provide our customers with invaluable information and assistance in filling line trails or adjustments.

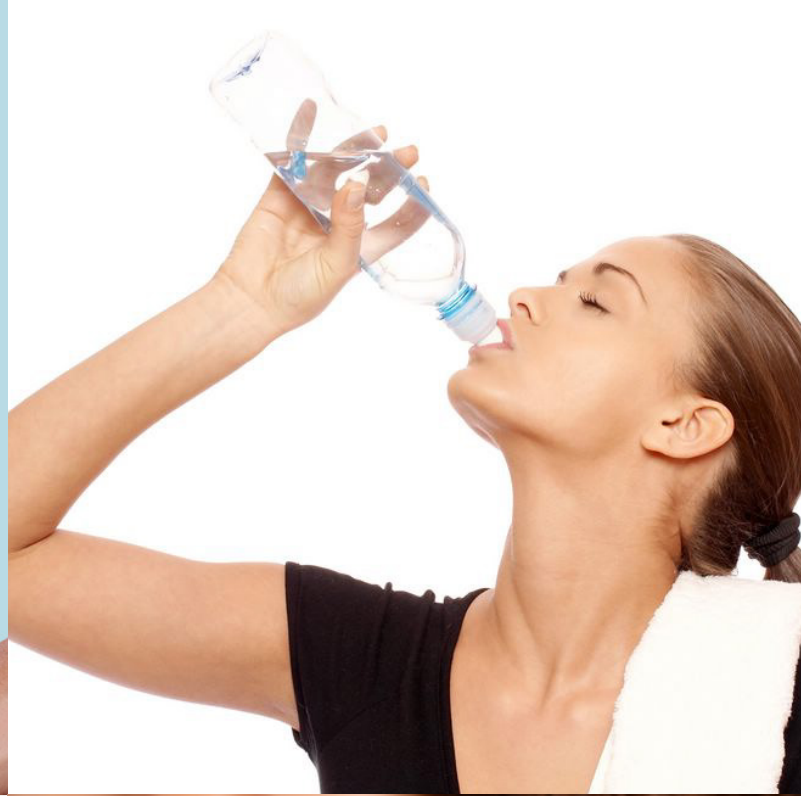

## Market Research

The combination of primary and secondary research enables Aptar to help our customers further understand the packaging needs of their target customer through ideation & prototyping.

## Quality Assurance

Aptar leverages advanced equipment and knowledgeable subject matter experts to supply the best possible products to ensure compatibility and high-performance dispensing.
